Summary of Courses

The Advanced Medical Spa Diploma is designed to prepare students for employment in medical spas, wellness spas, laser centers, and other health-related settings such as full-service spas. The program focuses on the concepts and theories associated with Esthetics.

Inside this guide, you'll find a summary of the Bryan College curriculum. Please feel free to speak with an admissions advisor to learn more.

MS10 - Medi-Spa

Students in the Medi-Spa course will perform assignments and learn Fitzpatrick skin typing, laser versus IPL, patch testing, laser hair capillary, and pigment removal techniques. Students are exposed to photo facials, microdermabrasion, radio frequency body contouring, and fractional skin resurfacing.

SC10 - Skin Care/Anatomy/Physiology

This course provides the students with an overview of the structure, function, layers, and appendages of the skin. Students gain competence in identifying pathologies and diseases of the skin and learn how to perform lymphatic drainage. Students will learn the fundamentals of performing facials and other various skin treatments.

MP10 - Manicure and Pedicure

Students in this course learn to identify bones and muscles of the hands, arms, feet, and legs; identify pathologies of the hand, nail, foot, and skin. Students study the growth cycle of the nail and focus on client care, safety, and hygiene through relevant practical work, shellac, and polish application.

WA10 - Waxing

This course will cover the technical skill of hair removal through different professional hair removal techniques. Students learn to identify the structure and function of hair, its growth cycle, and diseases and disorders associated with hair.

BU10 - Business Management

This course will introduce you to the knowledge of working in or managing a spa. It will provide you with an understanding of the employment environment, resume writing, interviewing techniques, and business planning to prepare you for the important role you will play in the industry.

RM10 – Body Treatments & Relaxation Massage

Students learn to administer the principles of multiple hydrotherapy modalities safely and appropriately. Students will understand specific body treatments including body aromatherapy, mud wraps, seaweed wraps, salt glows, and body scrubs.

CS10 – Makeup Artistry

This course provides students with a basic understanding of cosmetic chemistry and regulations within the industry. Students learn applications for day, evening, runway, and bridal settings.

CB10 – Student Clinic

The Student Esthetics clinic provides students with the opportunity to develop and practice their skills through interaction with the general public. Each clinic session is supervised by a member of the Esthetics faculty, who is a qualified Esthetician, and able to provide guidance and assistance to the student and client. Students work in a clinical setting providing esthetic services such as manicures and pedicures, waxing, facials, make-up application, and relaxing body massage.

Explore our North York Onsite Student Clinic Campus

We invite you to come and explore our Bryan College campus. For hands-on, in-person practice and clinical work, you will attend classes at our campus located in North York, Ontario. The campus is accessible by public transportation.

Onsite Student Clinic

Students are introduced to multiple different clinical environments under the supervision of an experienced credentialed faculty member. In the onsite Student Clinic, they will have the opportunity to learn and practice both treating members of the general population and running the day-to-day operations of a clinic.
